Monolith Polyurethane ICF

Simplify Construction and Maximize ROI

Monolith™

Polyurethane Insulated Concrete Forms

THE BETTER ICF.

7-IN-1 BUILDING SYSTEM

STRUCTURE

Monolithic concrete core delivers 1.8x strength of traditional ICF with 250+ mph wind resistance.

VAPOR BARRIER

Almost zero water absorption prevents moisture infiltration, eliminating mold conditions and structural deterioration.

FIRE BARRIER

Class 1/A rated system provides 4+ hour fire resistance while maintaining structural integrity.

FINISH-READY

Embedded attachment points every 8 inches provide 1,000+ lb pullout strength throughout wall surface.

INSULATION

R-38 continuous thermal performance eliminates thermal bridging while maintaining effectiveness permanently over decades.

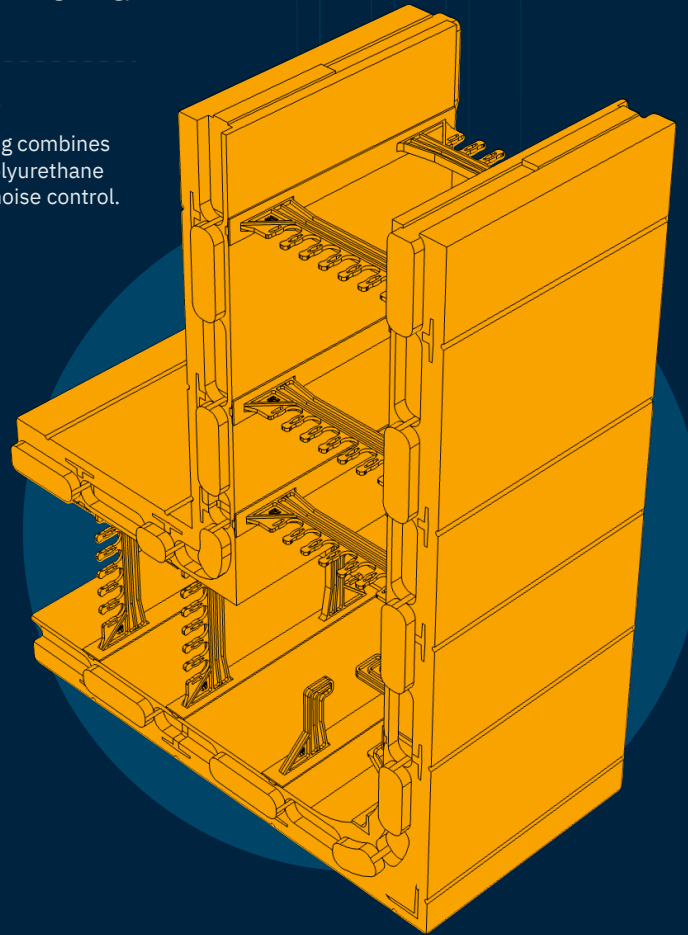

AIR BARRIER

<1 ACH50 airtightness through interlocking design exceeds Passive House standards, eliminating energy waste.

SOUND BARRIER

STC 55+ acoustic rating combines concrete mass with polyurethane damping for superior noise control.

MONOLITH PRICING

TYPE	MSRP
6" Straight	\$31.50
6" Corner	\$34.00
8" Straight	\$32.50
8" Corner	\$36.30

WHY CHOSE MONOLITH:

Monolith ICF outperforms other building methods by delivering superior durability, faster construction, and significant cost savings. Its integrated systems streamline workflows, eliminate additional expenses like waterproofing and fur-outs, and simplify trade coordination, making it the optimal choice for builders seeking simplicity and ROI.
